*data columns:*    *off. name = name used by the state's national statistical office*  
                       *n/a = This data column is not available*  
                       *off. code = code used by the state's national statistical office or postal office; roads: off. route*  
                       *cc = country code*

*Number of Layers*    27

*All layers are consistent and the borders of neighboring countries fit seamlessly.  
 The coordinates are stored as geographic coordinates (WGS84) without projection.*
