## AGENCY HISTORY

Top-ranking administrative offices at the Massachusetts Institute of Technology have evolved over the lifetime of the Institute. The position of the president was established in 1862, when the Institute charter was accepted by MIT. The position of the chancellor was created for the first time almost a century later, in the 1950s, to share administrative responsibilities of the president. The following section provides a summary of the president's functions and responsibilities, followed by a brief historical sketch of the office of the chancellor, and by a more detailed account of the structure of the office of the president and chancellor during the tenure of Jerome Wiesner and Paul Gray.

### Office of the President

The president is elected by the MIT Corporation and serves as the chief executive officer of the Institute in charge of its administrative matters. In this capacity, he serves as *ex officio* member of the MIT Corporation and of the following Corporation committees: Membership Committee, Development Committee, and Executive Committee. The president presides over Executive Committee meetings and sets the agenda. As the chief executive officer, the president makes recommendations to the Executive Committee regarding the organizational structure of MIT and presides over the Institute's faculty and Academic Council. The president is also responsible for initiating budgets, tuition increases, changes in the educational and research programs, new plant and facilities needs, and all other matters relating to Institute operations on which Executive Committee action or concurrence may be necessary or appropriate. In all matters that do not require Executive Committee action or concurrence, the president is responsible for both initiation and action.

### Presidents of the Institute:

William Barton Rogers, 1862-1870, 1879-1881

John Daniel Runkle, 1870-1878

Francis Amasa Walker, 1881-1897

James Mason Crafts, 1897-1900

Henry Smith Pritchett, 1900-1907

Arthur A. Noyes, acting president, 1907-1909

Richard Cockburn Maclaurin, 1909-1920

Elihu Thomson, acting president, 1920-1921, 1922

Ernest Fox Nichols, 1921

Samuel Wesley Stratton, 1923-1930

Karl Taylor Compton, 1930-1949

James Rhyne Killian, Jr., 1949-1959

Julius Adams Stratton, 1959-1966

Howard Wesley Johnson, 1966-1971

Jerome Bert Wiesner, 1971-1980

Paul Edward Gray, 1980-1990

Charles Marsteller Vest, 1990-2004

Susan Hockfield, president-elect (Elected by the Corporation on August 26, 2004)

**Office of the Chancellor**

The office of the chancellor of MIT is a position created at the discretion of the president and the Executive Committee. The Institute bylaws state: “the Chancellor shall have duties as the Executive Committee shall from time to time confer upon him.” The chancellor is a member, *ex officio*, of the Corporation and the Executive Committee and reports to the president and the Executive Committee.

The position of the chancellor was first created in 1956 under President Killian in recognition of the increased scope of responsibilities at MIT, its many and unusual national obligations during the period, and the consequent need for greater sharing and delegation of administrative responsibilities. Julius A. Stratton served as the first chancellor, 1956-1959. Stratton’s responsibilities included administration of the Institute’s academic program in all its parts, with all academic officers coming under his jurisdiction; serving as deputy to the president and general executive officer for all Institute affairs; and, in the absence of the president, holding the powers and performing all duties and functions of the president.

The position was reinstated in 1971, when Paul Gray was appointed chancellor under President Wiesner, with authority to serve as deputy to the president on all matters. Gray served in this post until he became MIT president in 1980.

As academic administration became increasingly complex, the position of chancellor was again reinstated by President Vest, who appointed Lawrence Bacow as the third chancellor effective August 1998. The chancellor's duties are to coordinate undergraduate and graduate education, manage and develop programs with institutional partners in industry and in the international arena, and have major responsibility for long-range planning for MIT. Lawrence Bacow was succeeded by Philip Clay in 2001.

Chancellors of the Institute:

Julius Adams Stratton, 1956-1959

Paul Edward Gray, 1971-1980

Lawrence Seldon Bacow, 1998-2001

Philip L. Clay, 2001-

**Office of the President and Chancellor, 1971-1980**

When Howard Johnson announced his intention to retire as MIT president as of June 1971, the Corporation appointed a presidential search committee to select the new president. The committee chaired by James Fisk nominated Jerome Wiesner as Johnson’s successor. At the same time, responding to the needs of the Institute, the committee recommended that the post of chancellor be reestablished and named Paul Gray, associate provost, to the position.

During the first year of their working together, Wiesner and Gray shared most of their responsibilities, the chancellor having major responsibilities for the Institute’s budget. In the fall of 1972 they divided their responsibilities to allow the president to concentrate on

policies and strategies for the future development of the Institute, and the chancellor to assume general management responsibilities for academic, research, and administrative programs<sup>1</sup>. Those changes led to modification of the reporting structure. Vice presidents were to report to the chancellor on all administrative matters, and the provost was to report on the academic and research programs. In addition, several other offices reported directly to the chancellor, including the Dean for Student Affairs, the Special Assistant to the Chancellor for Pre-professional Programs, the Assistant to the President and Chancellor for Minority Affairs, and the Director of Information Processing Services.

Recognizing the need to address the major issues facing the world such as those related to controlling the proliferation of nuclear weapons, providing energy and food for exponentially growing populations, protecting the environment, and increasing industrial productivity, Wiesner and Gray set the goals of their administration to continue and enhance searching for the “ways to apply knowledge and skills of science and technology to the pressing problems of our society.”<sup>2</sup> That meant providing the best scientific and technological education and fostering diverse research efforts relevant to the most important issues of today and to the anticipated needs of generations to come.

Educational and research initiatives introduced during Wiesner’s and Gray’s administration included creating the Center for Policy Alternatives in 1972 to examine technology and engineering problems and their relation to social issues. An interdisciplinary major in the School of Science was established in 1971<sup>3</sup>, fostering programs linking science, technology, and social policy, and promoting diverse selection in environmental studies, education, and law. The Division for Study and Research in Education, formed in 1973, focused on studies of knowledge structures, including learning processes. The new Institute requirement in Humanities, Arts, and Social Sciences was approved in 1974, and the Writing Program was introduced the same year. Efforts to integrate the humanities into the education of scientists and engineers resulted in the establishment of the MIT Program in Science, Technology, and Society in 1978.

In the mid-1970s, the Committee on Research Structure, under the chairmanship of Professor Frank Press, evaluated the influence of the “national research climate” on research operations at MIT. In its report, published in 1976,<sup>4</sup> the committee recommended enhancing the role of the research centers at the Institute to provide new sources of funding and research opportunities. It also recommended expanding research staff opportunities by creating new research positions in addition to the traditional teaching faculty structure.

<sup>3</sup> *Report of the President and the Chancellor - Massachusetts Institute of Technology 1971-1972* (Cambridge: Massachusetts Institute of Technology, 1972), pp.191-192.

<sup>4</sup> “Report of the Committee on MIT Research Structure.” (Cambridge: Massachusetts Institute of Technology, October 1976).

Growing interest in the life sciences and health studies led to new major programs on the campus. The Center for Cancer Research, under Professor Salvador E. Luria, was created in 1972.<sup>5</sup> The [Harvard-MIT] Division of Health Sciences and Technology and the College of Health Science, Technology, and Management were established in 1977<sup>6</sup> to provide venues for research and academic activities that were outgrowing the mandate of the Joint Harvard-MIT Program in Health Sciences and Technology.

The recognition of the importance of the arts and humanities in complementing educational and research activities led to the establishment in 1971 of the Council for the Arts, a volunteer group of alumni and others promoting development of the arts at MIT, and to the formation of the Corporation Visiting Committee for the Arts. President Wiesner's strong support for the arts and his interest in exploring interactions between the arts and technology led in the late 1970s to the Arts and Media Technology project under the leadership of Nicholas Negroponte.<sup>7</sup>

The ambitious, forward-looking goals of the Institute in the 1970s led Wiesner and Gray to create several new senior administrative posts during the first years of their tenure:

- 1972/1973 - Assistant for Minority Affairs (later Assistant to the President and Chancellor for Minority Affairs)
- 1972/1973 - Special Assistant to the Chancellor (later Special Assistant to the Chancellor for Pre-professional Programs)
- 1973/1974 - Assistant to the President for the Arts
- 1973/1974 - Special Assistant to the President on Urban Resources
- 1973/1974 - Special Assistant to the President and Chancellor for Women and Work

The next major revision of the division of responsibilities between the president and the chancellor came in December 1977.<sup>8</sup> For the duration of the Leadership Campaign, a major fund raising campaign launched by the Corporation in 1975, the president was to focus on the campaign-related activities in close collaboration with Howard Johnson—the leader of the campaign and chairman of the Corporation. At the same time, the chancellor assumed responsibility for all management decisions regarding academic and administrative activities on the campus, including planning and developing strategies for the future. This change led to the transfer of a wide variety of functions and responsibilities from the president to the chancellor, including chairing committees and

meetings. The position of the chancellor was discontinued in 1980 when Paul Gray became the president of the Institute in 1980.

## **PROVENANCE NOTE**

The records were received by the Institute Archives and Special Collections from the office of the president in five separate transfers from 1979 through 1985.

## **PROCESSING NOTE**

The collection was received in five accessions from 1979 through 1985. The first accession, the largest in volume, was composed of nine series created, named, and maintained by the president's office staff. Files from the four later accessions were interfiled into the nine series.

Folders were generally kept in the order in which they were received, though some series were rearranged into chronological order from a reverse chronological order for ease of use, and related files from separate accessions were grouped together to reunite records separated over time. There was some minor rearrangement of folders if it appeared that they had been misfiled. The contents of folders were almost never rearranged except when there was an apparent order and some re-creation of that order enabled staff to identify duplicate material.

Folders containing material restricted according to MIT access policies have been marked to indicate the length of restriction [e.g. (R-50) or (R-75)]. Archives reference staff will screen folders containing restricted material and allow patrons access to non-restricted documents. Patrons can learn more about the access policies through a page on the Archives' web site <<http://libraries.mit.edu/archives/managing/policy-access.html>>.

Photographs have been removed from their original locations and placed in box 253. Photocopies of the photographs were left in the original folders with a notation indicating the folder in which they can be found in box 253. Also, faculty tenure files and student files have been removed from their original locations and placed at the end of the collection in box 254.

Documents and files were removed from the collection and destroyed if they were duplicates or were not permanent records according to records retention policies. These included folders of prospective personnel, and vouchers, bills, airline tickets and similar types of financial records.

## **SCOPE AND CONTENT NOTE**

The collection is composed primarily of records of the Massachusetts Institute of Technology. The dates of the records in the collection span from 1960 to 1984, though

the bulk was created between 1966, when Wiesner was appointed provost, and 1980, when he retired as president of MIT. The collection also includes records created when Wiesner was director of MIT's Research Laboratory of Electronics (1952-1960), dean of science (1964-1966), and provost (1966-1971). There are a few files from Wiesner's tenure as Science Advisor to the President (John F. Kennedy and Lyndon B. Johnson) from 1961 through 1964.

The Institute records in the collection encompass all aspects of life at MIT and reflect the widespread responsibilities of the president. The collection documents an elaborate bureaucratic institution striving to achieve academic and research excellence. Though Wiesner, Chancellor Paul Gray, and Provost Walter Rosenblith divided the responsibilities of the office of the president, Wiesner was kept informed of the academic and research programs and their needs, the administration and organization of the Institute, staffing and faculty, and ongoing equipment and facility needs. Wiesner's major responsibilities revolved around fund raising, especially the Corporation Leadership Campaign (boxes 220-222); alumni/ae groups; and representing MIT beyond the campus.

A large part of Wiesner's time was spent working with other academic and educational entities to advocate for federal and private funding for institutions of higher learning as well as raising funds for MIT, and the collection is very rich in documenting his advocacy and fund raising activities. Some of the groups MIT worked with were the American Association of Presidents of Independent Colleges and Universities (box 111), the Association of American Universities (boxes 112-116), the Association of Independent Colleges and Universities in Massachusetts (boxes 116-118), and the National Association of State Universities and Land Grant Colleges (boxes 125-126). In the 1970s institutions of higher learning faced escalating research costs and cuts in federal and private funding, and they needed to increase revenue. At MIT, tuition was increased, reductions were made to administrative and academic staff as well as faculty, and fund raising efforts were intensified. The fruits of MIT's fund raising supported capital projects to refurbish or replace outdated buildings and equipment, endowed professorships, provided additional support for special projects in existing programs or start-up funding for new programs, and nurtured the arts on campus. MIT strengthened its Industrial Liaison Program (boxes 52-53, 239-240) to increase its funding from corporations for specific research and training programs. Wiesner traveled frequently to visit various MIT alumni clubs to maintain and nurture ties to MIT (boxes 14-15), and to encourage financial support from alumni.

The contents of the collection also reflect the response by MIT and various members of the MIT community (students, faculty, staff) to the society and the culture of United States in the late 1960s and 1970s: student unrest and anti-war protests (boxes 28, 93-98, 108), the growth of the feminist movement (boxes 109-110), efforts to increase the presence of minorities on campus (boxes 18, 32, 44, 69, 98), federal mandates regarding affirmative action (boxes 9-11, 44), environmental concerns (boxes 26, 72, 83, 92), concerns about bio-engineering (boxes 28, 36), the divestment of funds (box 55), classified research at the Instrumentation Laboratory [precursor of Draper Laboratory]

(boxes 195-196), and international issues, especially changing United States relationships with Iran (box 62) and China (box 25-26).

The development of many new educational and research programs is documented in the collection, such as the Science, Technology, and Society Program (box 86); the Undergraduate Research Opportunities Program [UROP] (box 103); the Education Research Center [later the Division for Study and Research in Education] (boxes 39-41); programs with Wellesley College (boxes 108-109); and the Harvard-MIT Division of Health Sciences and Technology (boxes 36-38, 236-328).

Weisner's efforts to increase the arts on campus are seen in the records of various committees and activities concerning visual and performing arts (boxes 16, 27, 33-34, 67, 169, 225-227, 253).

The collection also documents MIT's commitment to community issues such as Boston's school desegregation (boxes 119-120) and the Institute's collaboration with the cities of Boston and Cambridge on issues of mutual concern (boxes 18, 24). Information about MIT's celebration of the nation's bicentennial is included in the collection as well (box 17).

A small part of the collection documents positions Wiesner held outside of MIT. Records in Series VI document trips Wiesner took to attend meetings in Washington D.C. of the President's Science Advisory Committee (PSAC), and internationally as Science Advisor to the President of the United States or representing the American Academy of Arts and Sciences (boxes 251-252).

### **Related Collections in the Institute Archives and Special Collections**

The list below includes archives and manuscript collections held by the Institute Archives and Special Collections that contain materials documenting the topics and issues relevant to the administrative, academic, and research activities at MIT in the 1970s.

**SERIES LIST**

Photographs removed from their original locations were not treated as a separate series, but were placed in box 253.

Series I	MIT Correspondence, 1960-1984
Series II	Non-MIT Correspondence, 1964-1982
Series III	Chronological Correspondence, 1967-1980
Series IV	Logs, 1967-1980
Series V	Corporation, 1971-1982
Series VI	Schools, 1964-1980
Series VII	Departments, 1965-1980
Series VIII	Laboratories and Centers, 1962-1980
Series IX	Fund Raising, 1964-1982
Series X	Travel, 1961-1978

**SERIES DESCRIPTIONS**

**SERIES I. MIT CORRESPONDENCE, 1960-1984**

Boxes 1-110, 254

The series is composed of information being exchanged between the president's office and others at MIT. These are administrative files documenting aspects of academic, administrative, and research life as well as student programs and issues at the Institute. The files include correspondence, memoranda, minutes, agendas, and reports. The folders are filed alphabetically; their contents are generally in reverse chronological order.

**SERIES II. NON-MIT CORRESPONDENCE, 1964-1982**

Boxes 111-129

The series is arranged alphabetically. It contains correspondence, reports, and, memoranda--some informational, some from professional or academic groups, other academic institutions, or U.S. federal, state or local government officials soliciting advice or information from Wiesner in his capacity as MIT president. Some questions were answered by Wiesner and others were answered by his designees. The subject matter

includes funding concerns, research, professional and academic trends, changes in tax laws, federal funding for education and scientific research, and advocacy for support of higher education.

### **SERIES III. CHRONOLOGICAL CORRESPONDENCE, 1967-1980**

Boxes 130-141

The series consists of outgoing correspondence from Weisner's tenure as director of the MIT Research Laboratory of Electronics (1952-1961), dean of science (1964-1966), and provost (1966-1971) as well as president (1971-1980), and some written after his presidency. The files were rearranged into ascending chronological order from a reverse chronological order; the contents of the folders are usually in reverse chronological order. This series is further broken down into two separate groups of correspondence with members of the MIT community and with those outside of the MIT community. There is a large amount of restricted material in this series.

### **SERIES IV. LOGS, 1967-1980**

Boxes 141-147

The files are arranged in three subseries: **Correspondence Logs** (1972-1980), **Telephone Logs** (1967-1980), and **Signature Logs** (1971-1977). Folders within each subseries were rearranged into ascending chronological order from a reverse chronological order.

The **Correspondence Logs** record incoming correspondence, the staff person to whom or the office to which it is referred (for information or for action), the date answered and, occasionally, the subject. Folders are in chronological order and their contents are roughly in alphabetical order by correspondent.

The **Telephone Logs** are in chronological order and record the date a telephone call was received, the name, affiliation and telephone number of the caller, and a brief message.

The **Signature Logs** record when the president signed correspondence. The folders are chronological. The logs are alphabetical by the office from which the correspondence originated and then chronological. They record the office from which the correspondence originated, the date received into the president's office, the date sent from the president's office, and the subject of the letters.

### **SERIES V. CORPORATION, 1971-1982**

Boxes 148-169

The files are arranged in three subseries: **Executive Committee, Corporation,** and **Corporation Subcommittees**. The **Executive Committee** and **Corporation** records contain agendas, minutes, memoranda, correspondence, budgets, reports, and department profiles, as well as personnel information. The files are arranged chronologically in both subseries. The **Corporation Subcommittee** subseries is arranged alphabetically. The files are restricted for at least 50 years, though many files contain decisions about individual personnel or students or fund raising, and are therefore restricted for 75 years.

**SERIES VI. SCHOOLS, 1964-1980**

Boxes 170-174

The series includes correspondence, memoranda, grant proposals and reports between academic and administrative deans and the president. A wide variety of topics is documented, including proposals for new laboratories and centers, degree and academic programs, research projects, and staff and faculty positions; organizational plans; budget and funding concerns; personnel issues (faculty and staff: praise, concerns, appointments, resignations, deaths, salaries); the suitability of existing equipment and facilities and plans for new ones; grant proposals; reflection on the course of schools, departments or programs with academic leadership changes due to retirements and resignations; academic and professional accreditation of degree programs; and reviews of accomplishments. The financial concerns of the Institute resulting from the national economic climate led to serious evaluations of programs and their organization. Folders are arranged alphabetically.

**SERIES VII. DEPARTMENTS, 1965-1980**

Boxes 175-191

The series contains correspondence, memoranda, reports, etc. between the president's office and departments of the Institute. Some interactions are informational, and others deal with specific issues. The folders are alphabetical by department name. They contain information about the activities, needs, and plans of the departments and information about staff, students, programs, and facilities.

**SERIES VIII. LABORATORIES AND CENTERS, 1962-1980**

Boxes 192-207

The series contains information about existing research and programs, new centers and laboratories, grants, long- and short-term goals, and funding. The files include correspondence, memoranda, flyers, reports, grant applications, reports, invitations, curricula vitae, brochures, news releases, and research proposals.

**SERIES IX. FUND RAISING, 1964-1982**

Boxes 208-249

The series has five subseries: **Correspondence** (general and chronological file of outgoing), **Capital Campaign Information**, **Building Project or Potential Funding Source**, **Professorships**, and **Travel**.

The general **Correspondence** folders are arranged chronologically, with the contents in reverse chronological order. They are letters to and from Jerome Wiesner and MIT staff (especially development staff) and others about individual donors and other funding sources such as corporations and businesses, trusts, fellowships, grants, and corporate and private foundations. The subseries mostly consists of correspondence but there are also memoranda and some background information, in preparation for meetings or proposals to donors, such as journal articles and newspaper clippings. Funds are sought for a wide variety of things for MIT, including professorships, capital projects, programs, research projects, endowment funds, art work, and student scholarships. The

chronological outgoing correspondence files contain copies of all the outgoing correspondence from the president's office related to fund raising.

The **Capital Campaign Information** subseries includes files on the Capital Campaign, the Leadership Campaign and the Council on Resources of the Institute (CRI).

The **Building Project or Potential Funding Source** subseries contains files on the various buildings, scholarships, programs, etc. for which funds were sought as well as files about potential or actual donors or funding sources. The subseries is arranged alphabetically, with files on sources and recipients of funds interfiled. The contents are similar to those of the general correspondence subseries. Information about fund raising for an electrical engineering building is the most extensive.

The **Professorships** files are arranged as they were received by the Institute Archives and Special Collections. They contain correspondence, memoranda, and information about the professorships.

The **Travel** files relate to specific trips Wiesner took for fund raising and complement records in other subseries. The documents in the files are arranged in reverse chronological order.

The folders contain a large amount of restricted material and may not contain any unrestricted documents.

### **SERIES X. TRAVEL, 1961-1978**

Boxes 250-252

The series has two subseries: **MIT Travel** and **Non-MIT Travel**.

The **MIT Travel** files document Wiesner's trips on behalf of MIT to attend alumni gatherings, meetings, symposia and conferences; give speeches; and meet with potential donors and industrial, national and international partners in various MIT projects and programs. They are arranged in their original reverse chronological order and contain itineraries, correspondence, invitations, background files and newspaper clippings.

The majority of the **Non-MIT Travel** files document trips Wiesner took to attend meetings of the President's Science Advisory Committee (PSAC), as Science Advisor to the President of the United States or representing the American Academy of Arts and Sciences. Wiesner traveled with other government and Academy representatives to talk with scientists and government officials in other countries about their scientific and technological research and plans, to promote science and technology, and to discuss specific issues such as arms control, nuclear disarmament, waterlogging, and salinity. The folders are in reverse chronological order, and in addition to the type of documentation that is in the MIT travel files, they also contain press releases and follow-up reports about the trips.
