Summary Information

| | |
|-------------------------|--|
| Repository | Institute Archives and Special Collections |
| Creator | Lynch, Kevin, 1918-1984 |
| Title | Kevin Lynch papers |
| Date [inclusive] | 1934-1988 |
| Extent | 16.5 cubic feet in 12 record cartons, 8 manuscript boxes, 1 half manuscript box, 4 medium flat boxes, 1 large flat box, 3 small media boxes, 1 slide box and 2 loose drawings |
| Location | Materials are stored off-site. Advance notice is required for use. |
| Language | English |
| Abstract | This collection documents the career of Kevin Lynch. Lynch was a member of the faculty at the Massachusetts Institute of Technology from 1948 to 1978 in the Department of City and Regional Planning, and was a leader in the field of city planning and urban redevelopment. Material in this collection covers research data, correspondence, course material, trip diaries, and manuscripts. |

Citation

Kevin Lynch papers, MC 208, box X. Massachusetts Institute of Technology Institute Archives and Special Collections, Cambridge, Massachusetts.

Biography

Kevin Andrew Lynch was born in Illinois in 1918. He began his study of architecture at Yale University in 1935; then Taliesin (under Frank Lloyd Wright), 1937-1939 and Rensselaer Polytechnic Institute, 1939-1940. He earned a B.C.P. degree from the Massachusetts Institute of Technology in 1947. He was appointed instructor in city planning at MIT in 1948, assistant professor in 1949, associate professor in 1955, and professor in 1963. Lynch retired from MIT in 1978 to found, with Stephen Carr, the design firm Carr, Lynch and Associates.

Lynch consulted for many cities in the United States and abroad on projects including Boston's Government Center and Waterfront Park, Detroit's Riverfront, major art institutions in Dallas, and urban design plans in Minneapolis, Los Angeles, San Francisco, and San Diego. Lynch's publications include *The Image of the City* (1960), which summarizes a five-year study he directed with Gyorgy Kepes on how people perceive their cities; *What Time is This Place?* (1972), which examines how time may be passed in cities, as well as urban conservation; and *Growing Up in Cities* (1977), which he edited and which explores how environments affect children.

Lynch influenced the field of city planning through his work on the theory of city form, and on the perception of the city environment and its consequences for city design. Kevin Lynch died in April 1984.

Arrangement of the collection

The collection is organized into two series: Perceptual Form of the City Files, 1951-1960, and Materials to be Processed, 1934-1988.

Administrative Information

Access note

The collection is open for research. The collection is not yet fully processed and may need to be screened before use. In accordance with MIT policy, there may be restrictions on access to MIT records

Intellectual property rights

Access to collections in the Institute Archives and Special Collections is not authorization to publish. Separate written application for permission to publish must be made to the Institute Archives. Copyright of some items in this collection may be held by respective creators, not by donor of collection.

Acquired from

Materials were given to the Institute Archives and Special Collections by Kevin Lynch and the family of Kevin Lynch in 1979, 1980, 1982, 1986, 1989, 1993, and 1997.

Location of copies

Digital surrogates of selected material from the series "Perceptual Form of the City" can be accessed through the MIT Libraries digital repository, DOME, at <http://dome.mit.edu/handle/1721.3/33656>.

Collection Inventory

Series. Perceptual Form of the City 1951-1960

Historical note

In 1954 Kevin Lynch began a research project called The Perceptual Form of the City, a five year project funded by The Rockefeller Foundation. The study was done under the direction of Lynch and Professor Gyorgy Kepes at the Massachusetts Institute of Technology Center for Urban and Regional Studies. The research findings were published in 1960 in Lynch's seminal work, *The Image of the City*.

The Perceptual Form of the City study addressed the legibility and imageability of the American city. The study focused on the cities of Boston, Massachusetts; Los Angeles, California; and Jersey City, New Jersey.

According to the 1955-1956 *MIT Directory of Current Research*, Perceptual Form of the City was an "investigation directed toward development of a theoretical concept of city form. An attempt is being made to supply the fundamental criteria and techniques for conceiving, expressing and controlling our perceptual environment."

In 1958-1959 the project is described as "an investigation of the individual's perception of the urban landscape. The inhabitant's and the highway traveler's image of the city, and the use of the signs and symbols in the cityscape are of interest. The objective of this work is the development of new design possibilities and principles for the city."

In its final iteration the study comprised two main components. The first was a field trip made by a trained observer, who mapped out the various elements of the city, which Lynch describes as nodes, paths, edges, districts, and landmarks. The second component was office interviews with a sample of residents from each city. Thirty interviews were conducted in Boston and fifteen in both Los Angeles and Jersey City. The study was extended in Boston with sixteen of the original thirty interviewees participating in an additional interview and field trip.

Perceptual Form of the City

A more detailed explanation of the research process can be found in Appendix B of *The Image of the City*.

Scope and content note

This series complements Kevin Lynch's 1960 book *The Image of the City*. The material contained in this series relates to Lynch's study *The Perceptual Form of the City*, conducted at MIT with Gyorgy Kepes from 1954 to 1960. The research done in this study was the foundation of his theories on city planning discussed in the book.

The majority of the series can be categorized into two main groupings, records documenting the planning, preparation, and progress of the project (1951-1956), and those that document the research process and findings (1954-1959). These records include field notes, interview transcripts, collected data, correspondence regarding the progress of the project and hand drawn maps. The remainder of the series includes the original artwork and photographs published in *The Image of the City*.

The material in many of the folders in boxes 2 and 3 refer to an overlapping project Lynch conducted with Malcolm Rivkin. The results of the project were published as "A Walk Around the Block," in *Landscape*, Spring 1959.

Research: *The Perceptual Form of the City* included field research in Boston, Massachusetts; Los Angeles, California; and Jersey City, New Jersey. The majority of this collection relates to the Boston phase of the project. Only three folders refer specifically to the Los Angeles and Jersey City portions of the project.

Before beginning interviews in Boston, Lynch had his assistants survey the city and pilot test the interview process. This initial survey served to map out the city being studied and to create the vocabulary that Lynch and his associates would use throughout the project. Materials related to this survey, and pilot tests completed by assistants David Crane and Richard Dober are located in the folder "Field Analysis – Whole City."

Book: In the margins of *The Image of the City*, Lynch included small graphics that served to illustrate the concepts he was discussing in the accompanying paragraphs. This series contains these illustrations.

Also included in the series are the photographs and drawings printed in *The Image of the City*. Each object includes its "figure number," as assigned in the book, and the page number on which it can be found.

Perceptual Form of the City

This series contains “Reconsidering the Image of the City,” an essay written by Lynch for *Cities of the Mind: Images and themes of the city in the social sciences*, edited by Lloyd Rodwin and Robert Hollister. In this essay, Lynch reflects on research methodology used for the Perceptual Form of the City project and the impact of *The Image of the City* 20 years after its publication.

Series. Materials to be Processed

Materials to be Processed

Scope and content note

This series is currently unprocessed. This is not a complete description of the material in the series. The series includes materials related to Kevin Lynch's activities as a city planning professor at MIT; research relating to his publications, particularly *Growing Up in Cities* (1977), *A Theory of Good City Form* (1981), and *Wasting Away*; materials gathered for the UNESCO International Study of the Impact of Economic Development on the Spatial Environment of Children; and documentation for city planning and redevelopment projects conducted by Carr, Lynch Associates.

The series also includes poetry and papers written by Lynch while a student, high school philosophy notes, four volumes of European trip diaries (1952-1953), and a 1980 videocassette interview with Lynch conducted by Ann Buttimer entitled "Dream and Reality: Architecture and Urban Planning" about influences on Lynch's life and social concerns in architecture and city planning.

Location of copies

European trip diaries, index to the diaries, and high school philosophy notes, found in box 13, are also available on microfilm.

Conditions governing use

Audio tapes and film reels may need reformatting before being listened to or viewed.
